Hemp in Sweden

Building construction and renovation

Food innovation

Bio-composites

Textiles

Cosmetics

*Hemp for self-sufficiency and
resilience*

Hem(p) Co.'s mission

Making hemp and other natural materials the norm for building and renovation, in a world which is out of touch with the origins and true environmental and health costs of the products used.

www.hempco.se

Our resolution

We will help facilitate production and use of hemp in Scandinavia by increasing knowledge within the different industries about sustainable methods and materials involving hemp, in order to fit hemp into a local bio-based economy.
